

Prevention Committee Update

Tributary 1:

1. As of the annual meeting, there have been necessary changes to the contract with Force in the building of the new rock sediment barrier wall. The changes include:
 - a. East side of proposed wall was 4 feet deeper than originally planned, 4 feet more concrete was poured and additional gabion rip rap baskets added
 - b. Additional stone added behind east and west channel walls
 - c. Rip Rap wedge on each side of weathered bottoms of the existing gabion baskets on sides of culvert pipe.
 - d. Due to adverse unforeseen weather conditions during construction period, contract has been extended into spring. Completion of finish grade, seeding, and stone behind the new wall will occur in the spring. Temporary coffer dam will be removed and finished in the spring.
 - e. Construct a temporary riprap channel from the sediment basin berm to the upstream side of the new gabion wall to convey overflows during the winter months
2. Adam Engela has begun the dredging process of Tributary 1. He is adding a **temporary** access drive into the pond to get his equipment into the pond to dredge. Force is draining the pond often so that he can begin work dredging; unfortunately, Mother Nature is not cooperating. As of this update, more rain is predicted for the weekend :-)

Tributary 2:

Adam Engela is cleaning out behind Tributary 2 and replacing the trash rack. Additionally, we will have him repair some of the work left by the County Highway Department including grading and seeding. Rip-rap will be replaced at the bottom and sides of the culvert pipe (lake side). Adam will move the 4000 lb. barrier at the outlet of Tributary 2 as soon as he can. Land Use and Prevention Committee are meeting on Monday, December 5th to review both Tributary 1 and 2 progress and assess additional work to be completed in both.

Other Sites to Be Addressed

Tributary 1 and 2 are first priority, and if weather holds, Adam will work on other sites that the Prevention Committee and Board approved at the October Board meeting. Realistically, most of this work will probably be delayed until spring.

Continue to be aware of large equipment and trucks coming and going from both work sites.
Please no more rain!

Submitted by Peggy Voelz, Prevention Committee Chair

CONDOLENCES

The GLOA office was recently informed of the death of Patrick Hoyt on Saturday, November 24th in Colorado. Patrick was the son of former Grandview residents, Dan & Judy Hoyt of Indianapolis.
