

### **CONDOLENCES**

Our sympathy to the Maudlin family on the passing of Julia Richardson, daughter of Dave Maudlin, Lot 076, on Wednesday, March 13<sup>th</sup>. Visitation will be Monday, March 18<sup>th</sup> at Barkes, Weaver, Glick Funeral home on Jonathan Moore Pike from 10 a.m. to the time of service at 11 a.m.

### **Link for Grandview Survey**

**Please take a few moments to complete the survey below. Your input is needed so that the board can improve the way we communicate with and engage with lot owners. Feel free to reach out to Carrie Pumphrey if you'd like to get more involved or help out with community events. Thank you for your time!**

### **HOST NEEDED FOR THE “SPRING SOCIAL” IN MAY**

This is a very casual, evening gathering with a pitch-in of appetizers and “bring your own beverage”. It is a popular event with lot owners eager to catch up with one and other after the winter. We also introduce new lot owners. We just need a gathering place. If you prefer to host it outside that is fine and it can be “weather permitting”. You may choose any evening in May.

Please phone or e mail the office if you would consider hosting or have questions about what is involved. 812-342-1219 [gloa@grandviewlake.org](mailto:gloa@grandviewlake.org)

### **MARCH GLOA BOARD MEETING**

The March Board meeting will be on Thursday, March 21 at 7:00 p.m. Those wishing to attend in person are invited to come to the GLOA Office. Those wishing to attend by Zoom should send an email to Beth Ann Dismore no later than Wednesday, March 20, requesting the meeting link

## **Lake Safety—Jason Carroll**

### **Mistaken Identity: Beaver vs Muskrat**

Welcome to the 2024 boating season!! To start off lake safety in fine fashion, here is the first joke of the year: How does a beaver get online? Give up? He logs in!!!

**On that note, please see the below information regarding our furry friends below....**

While on land, beavers and muskrats are easy to tell apart, but it can be easy to confuse the two when they're spotted in the water. You can usually see a muskrat's whole body when it is swimming; however, you often can only see a beaver's large wedge-shaped heads while they swim. Beavers eat tree bark and chew down trees; muskrats eat grasses, vegetation and rubber around boats, wiring, etc. There have been a couple of reported beaver sightings and damage this week. If you notice any damage to trees or shrubs as noted in the photo above, or see a beaver swimming, please contact the GLOA office and they will advise me. Have a safe and happy spring season. -Jason

### **FREE FIREWOOD**
